

The Most Disputed Real Estate On Earth: A SPECIAL PROGRAM ON THE TEMPLE MOUNT

Coming on Wednesday, September 24

It is far and away the most disputed piece of real estate on the face of the earth — the Temple Mount in Jerusalem, a rectangular platform on a hilltop in Jerusalem, measuring some 350 yards wide and 550 yards in length.

Some have claimed this spot as the center of the universe. Others as the site for the final judgment of the world. Others as the epicenter of God's presence on earth. Still others as the focus and generator of all spiritual energy in the cosmos.

Abraham walked on it. King David walked on it. The Lord Jesus and His apostles walked on it. And the Muslim prophet Muhammad is reported to have flown to it at night, on his horse, el Buraq.

And to this day, after 5,000 years of recorded history, the Temple Mount still raises more questions than it answers.

It still stands as a great mystery to the faithful.

A special program at Gethsemane Cathedral, led by the dean, Dr. Steve Sellers, will look at the Temple Mount from a variety of angles — geological, historical, Biblical, and theological. The program will be held on Wednesday, September 24, as part of our new “Wednesday night at the Cathedral” program. The evening will begin at 5:30 p.m., with Holy Communion in the chapel, followed by a light dinner at 6 p.m. The program will begin at 6:30 p.m.

Students in the confirmation class will attend the Temple Mount class that evening.

Mark your calendars NOW for this special program!

If you have questions, please call the cathedral office.
